

FICCI and AT KEARNEY have jointly launched a report titled, “The Next Telecom Revolution” at the sidelines of India Telecom 2012.

The report highlights the need to create a supporting telecom ecosystem in the country and analysis how the new policy framework being worked out by the government going to address these needs. It reviews Indian as well as global telecom market trends in terms of infrastructure, technology, tariffs, devices and content.

The report also examines the key components of telecom manufacturing and research and development ecosystem. The study draws learning from other success stories globally, and suggests how India as a new entrant could further push the growth in telecom sector. The report identifies emerging investment opportunities in the telecom sector and provides insight on the expected market evolution.
